Introduction

This publication explains the federal income tax treatment of distributions paid or allocated to an individual shareholder of a mutual fund. A mutual fund is a regulated investment company generally created by "pooling" funds of investors to allow them to take advantage of a diversity of investments and professional management.

This publication provides information on investment expenses and will help you figure your taxable gain or deductible loss when you sell, exchange, or redeem your mutual fund shares. It discusses how to report your mutual fund distributions on Schedule B (Form 1040), *Interest and Dividend Income*, Schedule D (Form 1040), *Capital Gains and Losses*, and page 1 of Form 1040. It also provides a comprehensive filled-in example.

The rules in this publication also apply to money market funds. A **money market fund** is a mutual fund that tries to increase current income available to shareholders by purchasing short-term market investments. Usually, dividends are declared and reinvested daily. When you dispose of your shares, the proceeds generally equal your investment in the fund because the value of the shares generally does not change. Money market funds pay dividends and should not be confused with bank money market accounts that pay interest.

Qualified employee plans. Individuals may own shares of mutual funds as a part of an **individual retirement arrangement (IRA)**. Self-employed persons and partners may own shares of mutual funds as a part of a **simplified employee pension (SEP) plan** or an **H.R. 10 (Keogh) plan**. The value of the mutual fund shares and any earnings (distributions) from the fund are included in your retirement

See *How To Get More Information* near the end of this publication for information about getting these publications and forms.

Tax Treatment of Distributions

A mutual fund will send you a Form 1099-DIV, *Dividends and Distributions*, or a substitute form containing substantially the same language, to tell you what you must report or take into account on your income tax return. See *How To Report*, later.

Community property states. If you are married and receive dividend income that is community income, one-half of the income is generally considered to be received by each spouse. If you file separate returns, you must each report one-half of the dividend.

If the dividends are not considered community income under state law and you and your spouse file separate returns, each of you must report your separate income.

However, if you and your spouse lived apart all year, special rules may apply. Get Publication 555, *Community Property*, for more information on community income.

Share certificate in two or more names. If two or more persons, such as you and your spouse, hold shares as joint tenants, tenants

by the entirety, or tenants in common, dividends on those shares are considered received by each of you to the extent provided by local law.

Certain year-end dividends received in January. Dividends declared and made payable by mutual funds in October, November, or December are considered received by shareholders on December 31 of that year if the dividends are actually paid during January of the following year.

Kinds of Distributions

There are several kinds of distributions that you, as a shareholder, may receive from a mutual fund. They include:

- Ordinary dividends,
- Capital gain distributions,
- Exempt-interest dividends, and
- Return of capital (nontaxable) distributions.

Tax-exempt mutual fund. Distributions from a tax-exempt mutual fund (one that invests primarily in tax-exempt securities) may consist of ordinary dividends, capital gain distributions, undistributed capital gains, or return of capital like any other mutual fund. These distributions generally follow the same rules as a regular mutual fund. Distributions designated as exempt-interest dividends are not taxable (see *Exempt-Interest Dividends*, later).

Regardless of what type of mutual fund you have (whether regular or tax-exempt), when you dispose of your shares (sell, exchange, or redeem), you usually will have a taxable gain or a deductible loss to report. See *Sales, Exchanges, and Redemptions*, later.

Ordinary Dividends

An ordinary dividend is a distribution by a mutual fund out of its earnings and profits. Include ordinary dividends that you receive from a mutual fund as dividend income on your individual income tax return.

Ordinary dividends are the most common type of dividends. They will be reported in box 1b of Form 1099-DIV. If you reinvested your dividends, see *Reinvestment of Distributions*, later.

Capital Gain Distributions

These distributions are paid by mutual funds from their net realized long-term capital gains. The Form 1099-DIV (box 1c) or the fund's statement will tell you the amount you are to report as a capital gain distribution. Report capital gain distributions as long-term capital gains on your return regardless of how long you have owned the shares in the mutual fund. However, if you received a capital gain distribution on mutual fund shares that you held for 6 months or less **and sold at a loss**, see *Certain short-term losses* under *Holding Period*.

Undistributed capital gains. Some mutual funds keep their long-term capital gains and pay taxes on those amounts. You must report as long-term capital gains any amounts that the mutual fund allocated to you as capital

gain distributions, even if you did not actually receive them.

Form 2439. The fund will send you Form 2439, *Notice to Shareholder of Undistributed Long-Term Capital Gains*, showing your share of the undistributed capital gains and any tax paid by the mutual fund. You can take a credit for any tax paid because you are considered to have paid it. Take this credit by checking box a on line 57, Form 1040, and entering the tax shown on line 2 of Form 2439. Attach Copy B of Form 2439 to your return.

The undistributed capital gain reported on Form 2439 should be reported as a capital gain distribution in addition to any other capital gain distributions reported on Form 1099-DIV.

Increase to basis. When a mutual fund allocates undistributed capital gains to you, you can increase your basis in the shares. See *Adjustments to basis*, later.

Exempt-Interest Dividends

A mutual fund may pay exempt-interest dividends to its shareholders if it meets certain requirements. These dividends are paid from tax-exempt interest earned by the fund. Since the exempt-interest dividends keep their tax-exempt character, you do not include them in income, but you may need to report them on your return. See *Information reporting requirement*, next. The mutual fund will send you a statement within 60 days after the close of its tax year showing your exempt-interest dividends. Exempt-interest dividends are not shown on Form 1099-DIV. However, if you received exempt-interest dividends on mutual fund shares that you held for 6 months or less **and sold at a loss**, see *Certain short-term losses* under *Holding Period*, later.

Information reporting requirement. Although exempt-interest dividends are not taxable, you must report them on your tax return if you are required to file. This is an information reporting requirement and does **not** convert tax-exempt interest to taxable interest. Also, this income is generally a "tax preference item" and may be subject to the alternative minimum tax (AMT). If you receive exempt-interest dividends, you should get Form 6251, *Alternative Minimum Tax—Individuals*, for more information.

Return of Capital (Nontaxable) Distributions

A distribution that is not out of earnings and profits is a return of your investment, or capital, in the mutual fund and is shown in box 1d of Form 1099-DIV. These returns of capital distributions are not taxed as ordinary dividends and are sometimes called tax-free dividends or nontaxable distributions. However, they may be fully or partly taxable as capital gains.

A return of capital distribution reduces your basis in the shares. Basis is explained later. Your basis cannot be reduced below zero. If your basis is reduced to zero, you must report

Table 1. Reporting Mutual Fund Distributions on Form 1040

Type of Distribution	Where to Report If Total Dividends From All Payers Are:	
	\$400 or Less	More than \$400
Gross Dividends Form 1099-DIV, Box 1a	Total amount in Box 1(a) is not reported on form or schedule	Schedule B, line 5
Ordinary Dividends Form 1099-DIV, Box 1b	Form 1040, line 9	Already included in Gross Dividend amount on line 5 of Schedule B
Capital Gain Distributions Form 1099-DIV, Box 1c	Any other Schedule D transactions? * No —Form 1040, line 13 Yes —Schedule D, line 14	*Schedule B, line 7
Nontaxable Distributions Form 1099-DIV, Box 1d	Basis of shares reduced to zero? No —Not reported on form or schedule Yes —Report on Schedule D	Schedule B, line 8
Exempt-Interest Dividends (Not included on Form 1099-DIV)	Form 1040, line 8b	Form 1040, line 8b
Undistributed Capital Gains Form 2439, line 1 Form 2439, line 2	Gain —Schedule D, line 12 Tax —Form 1040, line 57	Gain —Schedule D, line 12 Tax —Form 1040, line 57

It will be to your advantage to report your capital gain distributions on Schedule D if your taxable income (Form 1040, line 37) exceeds certain amounts. See explanation, later, under "How to Figure Gains and Losses on Schedule D."

the return of capital distribution on your tax return as a capital gain. The distribution is taxable if it, when added to all return of capital distributions received in past years, is more than your basis in the shares. Report this capital gain on Schedule D (Form 1040). Whether it is a long-term or short-term capital gain depends on how long you held the shares.

Example. You bought shares in a mutual fund in 1992 for \$12 a share. In 1993, you received a return of capital distribution of \$5 a share. You reduced your basis in each share by the \$5 received to an adjusted basis of \$7. In 1994, you received a return of capital distribution of \$1 per share and further reduced your basis in each share to \$6. In 1995, you received a return of capital distribution of \$2 per share. Your basis is now reduced to \$4. In 1996, the return of capital distribution from the mutual fund is \$5 a share. You will report the excess (\$1 per share) as a long-term capital gain on Schedule D.

Reinvestment of Distributions

Most mutual funds permit shareholders to automatically reinvest distributions including dividends and capital gains in more shares in the fund through a dividend reinvestment plan. Instead of receiving cash, your distributions are

used to purchase additional shares in the fund. You must report the reinvested amounts the same way as you would report them if you received them in cash.

How the distributions are reported depends on the kind of distribution reinvested. This means that reinvested ordinary dividends and capital gains distributions generally must be reported as income. Reinvested exempt-interest dividends generally are not reported as income. Reinvested return of capital distributions are reported as explained under the discussion above. See *Basis of Shares Sold*, later, to determine the basis of the additional shares.

How To Report

Your mutual fund reports amounts distributed to you and amounts allocated to you on Form 1099-DIV, or on a substitute form containing substantially the same language. If the distribution consists of ordinary dividends only, you can file Form 1040A. Otherwise, you must file Form 1040. If the total distribution reported to you by the fund includes only ordinary dividends of \$400 or less, report the entire amount only on line 9 of Form 1040 or Form 1040A. Otherwise, you have to file one or

more additional schedules depending on the nature of the dividend income you receive.

Table 1, Reporting Mutual Fund Distributions on Form 1040, explains where on Form 1040 or its related schedules to report distributions from mutual funds. An explanation of the different types of distributions shown in the table was given earlier under *Tax Treatment of Distributions*.

Foreign tax deduction or credit. Some mutual funds invest in foreign securities or other instruments. Your mutual fund may choose to allow you to claim a deduction or credit for the taxes it paid to a foreign country or U.S. possession. The fund will notify you if this applies to you. The notice will include your share of the foreign taxes paid to each country or possession and the part of the dividend derived from sources in each country or possession.

You must complete Form 1116 if you choose to claim the credit for income tax paid to a foreign country. However, it may be to your benefit to treat the tax as an itemized deduction on Schedule A (Form 1040). For more information on claiming a foreign tax deduction or credit, get Publication 514.

Keeping Track of Your Basis

You should keep track of your basis in mutual fund shares because you need the basis to figure any gain or loss on the shares when you sell, exchange, or redeem them.

When you buy or sell shares in a fund, keep the confirmation statements you receive. The statements show the price you paid for the shares and the price you received for your shares when you disposed of them. The information from the confirmation statement when you purchased the shares will help you figure your basis in the fund.

If you acquire the shares by gift or inheritance, you need information different than what is in a confirmation statement to help you figure the basis of those shares, as discussed later.

Basis of Shares Sold

If you dispose of your shares in a mutual fund, it is important that you know their basis to figure your gain or loss. The basis depends on how the shares were acquired.

Shares Acquired by Purchase

The original basis of mutual fund shares you bought is usually their cost or purchase price. The purchase price usually includes any commissions or load charges paid for the purchase.

Example. You bought 100 shares of Fund A for \$10 a share. You paid a \$50 commission to the broker for the purchase. Your cost basis for each share is \$10.50 ($\$1,050 \div 100$).

Commissions and load charges. The fees and charges you pay to acquire or redeem shares of a mutual fund are not deductible. You can usually add these fees and charges to your cost of the shares and thereby increase your basis. A fee paid to redeem the shares is usually a reduction in the redemption price (sales price).

You cannot add the fee or load charge to your cost if all of the following apply:

- 1) You get a reinvestment right because of the purchase of the mutual fund shares or the payment of the fee or charge,
- 2) You dispose of the shares within 90 days of the purchase date, and
- 3) You acquire new shares in the same mutual fund or another mutual fund, for which the fee or charge is reduced or waived.

If the load charge is reduced, rather than waived, the amount in excess of the reduction is added to the cost of the original shares.

The amount of the load charge that is reduced or waived is added to the cost basis of the new shares (unless all of the above items apply to the purchase of the new shares).

Reinvestment right. This is the right to exchange your mutual fund shares for shares in the same or another mutual fund or to

purchase shares in another fund without paying a fee or load charge, or by paying a reduced fee or load charge.

Shares Acquired by Reinvestment

If you participate in an automatic reinvestment plan, keep the statements that show each date, amount, and number of full or fractional shares purchased. You should keep track of any adjustments to the basis of your mutual fund shares when the adjustment occurs.

Generally, you must know the basis **per share** to compute gain or loss when you dispose of the shares. This is explained later under *Identifying the Shares Sold*.

Ordinary dividends and capital gain distributions. The amount of the distribution used to purchase each full or fractional share is the cost basis for that share.

Exempt-interest dividends. The amount of the dividend used to purchase each full or fractional share is the cost basis for that share, even though exempt-interest dividends are not reported as income.

Shares Acquired by Gift

To determine your original basis of shares in a mutual fund you acquired by gift, you must know:

- The donor's adjusted basis,
- The date of the gift,
- The fair market value at the time of the gift, and
- Any gift tax paid on the gift of the shares.

Donor's adjusted basis. The donor's adjusted basis is the original cost or other original basis increased by such things as undistributed capital gains and decreased by such things as return of capital. Adjusted basis is discussed later.

Fair market value. The fair market value (FMV) of a share in a mutual fund you acquired by gift after 1954 is the public redemption price (commonly known as both the "bid price" or the "net asset value") at the time the gift was made. If you cannot determine the net asset value in effect at the time of the gift, use the last net asset value quoted by the fund for the date of the gift. If no net asset value is quoted for the date of the gift, for example, if that day falls on a Saturday, Sunday, or holiday, use the last net asset value quoted by the fund for the first day preceding the date of the gift for which there is a quoted value.

Fair market value less than donor's adjusted basis. If the shares were given to you, and their FMV at the time of the gift was less than the adjusted basis to the donor at the time of the gift, your basis for **gain** on their disposition is the donor's adjusted basis. Your basis for **loss** is their FMV at the time of the gift. In this situation, it is possible to sell the shares at neither a gain nor a loss because of the basis you have to use.

Example. You are given a gift of mutual fund shares with an adjusted basis of \$10,000

at the time of the gift. The FMV of the shares at the time of the gift is \$9,000. You later sell the shares for \$9,500. The basis for figuring a gain is \$10,000, so there is no gain. There also is no loss, since the basis for figuring a loss is \$9,000. In this situation, you have neither a gain nor a loss.

Fair market value more than donor's adjusted basis. If the shares were given to you, and their FMV at the time of the gift was more than the donor's adjusted basis at the time of the gift, your basis is the donor's adjusted basis at the time of the gift, plus all or part of any gift tax paid on the gift, depending on the date of the gift.

For information on figuring the amount of gift tax to add to your basis, see *Property Received as a Gift* in Publication 551.

Shares Acquired by Inheritance

If you inherited shares in a mutual fund, your basis is generally their FMV at the date of the decedent's death, or at the alternate valuation date, if chosen for estate tax purposes.

Shares decedent received as a gift. The above rule does not apply to appreciated property you or your spouse receive from a decedent if all the following conditions apply.

- 1) You or your spouse originally gave the shares to the decedent after August 13, 1981.
- 2) You gave the shares to the decedent during the one-year period ending on the date of death.
- 3) The death occurred after 1981.

In this situation, the basis of the shares is the decedent's adjusted basis in the shares immediately before his or her death, rather than their FMV. **Appreciated property** is any property (including mutual fund shares) whose FMV on the day it was given to the decedent is more than its adjusted basis.

If the estate, or a trust of which the decedent was the grantor, sells the appreciated property and the donor (or the donor's spouse) is entitled to the proceeds, the estate's or trust's basis in the property is the decedent's adjusted basis immediately before death.

Determining fair market value of inherited shares.

The FMV of a share in a mutual fund acquired from a person who died after August 16, 1954, is the last quoted public redemption price (commonly known as the "bid price" or "net asset value") on the date of death, or the alternate valuation date, if chosen for estate tax purposes. If no net asset value is quoted for the date of death or the alternate valuation date (for example, if that day falls on a Saturday, Sunday, or holiday), use the last net asset value quoted by the fund for the first day preceding the date of death (or the alternate valuation date) for which there is a quoted value. If a dividend was declared before the date of death and was payable after that date, the dividend is added to the ex-dividend quotation (price quoted excluding the value of a pending dividend) to determine the share's FMV.

Sales, Exchanges, and Redemptions

When you sell, exchange, or redeem your mutual fund shares, you will generally have a taxable gain or a deductible loss. This includes shares in a tax-exempt mutual fund. The amount of the gain or loss is the difference between your adjusted basis in the shares and the amount you realize from the sale, exchange, or redemption. "Adjusted basis" and "amount you realize" are defined later under *Gains and Losses*.

In general, a sale is a transfer of shares for money only. An exchange is a transfer of shares in return for other shares. A redemption occurs when a fund reacquires its shares. Sales, exchanges, and redemptions are all treated as taxable sales of capital assets.

Exchange of shares in one mutual fund for shares in another mutual fund.

Any exchange of one fund for another fund is a taxable exchange, even though you may be able to exchange shares in one mutual fund for shares in another mutual fund that has the same distributor or underwriter without paying a sales charge. Report any gain or loss on the investment in the original shares as a capital gain or loss in the year in which the exchange occurs. Usually, you can add any service charge or fee paid in connection with an exchange to the cost of the shares acquired. For an exception, see *Commissions and load charges*, earlier, under *Basis of Shares Sold*.

Information returns. Brokers must report to the Internal Revenue Service the proceeds from sales, exchanges, or redemptions. Brokers must give each customer a written statement with that information by January 31 of the year following the calendar year the transaction occurred. Form 1099-B, *Proceeds From Broker and Barter Exchange Transactions*, or a substitute, may be used for this purpose. Report your sales shown on Form(s) 1099-B (or substitute) on Schedule D (Form 1040) along with your other gains and losses. If the total sales reported on Form(s) 1099-B is **more** than the total you report on lines 3 and 11 of Schedule D, attach a statement to your return explaining the difference.

No information return is required if the mutual fund figures its current price per share for purposes of distributions, redemptions, and purchases so as to stabilize the price per share at a constant amount close to its issue price or the price at which it was originally sold to the public.

Taxpayer identification number. You must give the broker your correct taxpayer identification number (TIN). Generally, an individual will use his or her social security number as the TIN. If you do not provide your TIN, your broker is required to withhold tax at a rate of 31% on the gross proceeds of a transaction, and you may be penalized.

Identifying the Shares Sold

When you dispose of mutual fund shares, you need to determine which shares were sold and the basis of those shares. If your shares in a mutual fund were acquired all on the same day and for the same price, figuring their basis is not difficult. However, shares are generally acquired at various times, in various quantities, and at various prices. Therefore, the process can be more difficult. You may choose to use either the **cost basis** or the **average basis**.

Cost Basis

Under the cost basis, you can choose one of the following methods:

- Specific share identification, or
- First-in first-out (FIFO)

Specific share identification. If you can definitely identify the shares you sold, you can use the adjusted basis of those particular shares to figure your gain or loss.

You will adequately identify your mutual fund shares, even if you bought the shares in different lots at various prices and times, if you:

- 1) Specify to your broker or other agent the particular shares to be sold or transferred **at the time of the sale or transfer**, and
- 2) Receive confirmation of your specification from your broker **in writing** within a reasonable time.

The confirmation by the mutual fund must confirm that you instructed your broker to sell particular shares. You continue to have the burden of proving that you owned the specified shares at the time of sale or transfer.

First-in first-out (FIFO). If the shares were acquired at different times or at different prices and you cannot identify which shares you sold, use the basis of the shares you acquired first as the basis of the shares sold. Therefore, the oldest shares still available are considered sold first. You should keep a separate record of each purchase and any dispositions of the shares until **all** shares purchased at the same time have been disposed of completely. *Table 3* shows how to figure basis on a sale of shares in a mutual fund using the FIFO method. It also shows how to figure basis using the average basis method, discussed next.

Average Basis

You may choose to use an average basis to figure your gain or loss when you sell all or part of your shares in a regulated investment company, if you acquired the shares at various times and prices, and you left the shares on deposit in an account handled by a custodian or agent who acquires or redeems those shares.

Once you elect to use an average basis, you must continue to use it for all accounts in the same fund. However, you may use a different method for shares in other funds, even those within the same family of funds.

Example. You own two accounts that hold shares of the income fund issued by Company A. You also own 100 shares of the growth fund issued by Company A. If you elect to use average basis for the first account of the income fund, you must use average basis for the second account. However, you may use cost basis for the growth fund.

To figure average basis, you can use one of the following methods:

- Single-category method
- Double-category method

Single-category method. In the single-category method, you find the average cost of **all** shares owned at the time of each disposition, regardless of how long you owned them. Include shares acquired with reinvested dividends or capital gains distributions.

To compute the basis of your shares sold, follow these steps:

- 1) **ADD:** Cost of all shares owned.
- 2) **DIVIDE:** Cost of all shares by number of shares owned. This is your **average basis per share**.
- 3) **MULTIPLY:** Result of #2 (average cost per share) by number of shares sold.

Example 1. You bought the following shares in the LJP Mutual Fund: 100 shares in 1993 at \$10 per share; 100 shares in 1994 at \$12 per share; and 100 shares in 1995 at \$26 per share. On May 16, 1996, you sold 150 shares. The basis of shares sold is \$2,400, computed as follows:

Total cost	
(\$1,000 + \$1,200 + \$2,600)	\$4,800
Average basis per share	
(\$4,800 ÷ 300)	16.00
Basis of shares sold	
(16.00 × 150)	\$2,400

Remaining shares. The basis of your shares determined under average basis is the basis of **all** your shares in the account at the time of each sale. If no shares were acquired or sold since the last sale, the basis of the remaining shares at the time of the next sale is the same as the basis of the shares sold in the last sale.

Example 2. Using the same facts as in Example 1, assume you sold an additional 50 shares on December 15, 1996 at \$20 per share. You would not recompute the average basis of the 150 shares you owned at that time because no shares were acquired or sold since the last sale; rather, your basis is the \$16 per share computed earlier.

Even though you use only one category to compute basis, you may have short-term or long-term gains or losses. To determine your holding period, the shares disposed of are considered to be those acquired first. See *Holding Period*, later.

Double-category method. All shares in an account at the time of each disposition are divided into two categories: short-term and long-term. Shares held one year or less are short-

Table 3. How to Figure Basis of Shares Sold

This is an example showing two different ways to figure basis. It compares the FIFO method and the average basis (single-category) method.				
Date	Action	Share Price	No. of Shares	Shares Owned
2/4/95	Invest \$4,000	\$25	160	160
8/5/95	Invest \$4,800	\$20	240	400
12/16/95	Reinvest \$300 dividend	\$30	10	410
9/29/96	Sell \$6,720	\$32	210	200
FIFO:	To figure the basis of the 210 shares sold on 9/29/96, use the share price of the first 210 shares you bought, namely the 160 shares you purchased on 2/4/95 and 50 of those purchased on 8/5/95.			
		\$4,000 (cost of 160 shares on 2/4/95)		
		+ \$1,000 (cost of 50 shares on 8/5/95)		
		Basis= \$5,000		
AVERAGE BASIS (single-category):	To figure the basis of the 210 shares sold on 9/29/96, use the average basis of all 410 shares owned on 9/29/96.			
		\$9,100 (cost of 410 shares)		
		÷ 410 (number of shares)		
		\$22.20 (average basis per share)		
		\$22.20		
		× 210		
		Basis= \$4,662		

term. Shares held longer than one year are long-term.

The adjusted basis of each share in a category is the total adjusted basis of all shares in that category at the time of disposition divided by the total shares in the category. You may specify, to the custodian or agent handling your account, from which category the shares are to be sold or transferred. The custodian or agent must confirm **in writing** your specification. If you do not specify or receive confirmation, you must first charge the shares sold against the long-term category and then, any remaining shares sold against the short-term category.

Changing categories. After you have held a mutual fund share for more than one year, you must transfer that share from the short-term category to the long-term category. When you make the change, the basis of a transferred share is its actual cost or adjusted basis to you, or if some of the shares in the short-term category have been disposed of, its basis under the average basis method. The basis of the undisposed shares left in the short-term category that are changed to the long-term category is the average basis of the shares in the short-term category at the time of the most recent disposition from this category.

Making the choice. You choose to use the average basis of mutual fund shares by clearly showing on your income tax return, for each year the choice applies, that you used an average basis in reporting gain or loss from the sale or transfer of the shares. You must specify whether you used the single-category method or the double-category method in determining average basis. This choice is effective until you get permission from the IRS to revoke it.

Making the choice for gift shares. If your account includes shares that you received by gift, and the fair market value of the shares at the time of the gift was less than the donor's basis, special rules apply. To use the average basis, you must submit a statement with your initial choice to use one of the average basis methods. It must state that the basis used in figuring the average basis of the gift shares under either method will be the FMV at the time of the gift. This statement applies to gift shares you receive before and after making the choice, as long as the choice to use the average basis is in effect. If you do not make this statement, you cannot choose to use the average basis for any account that contains gift shares.

Gains and Losses

You figure gain or loss on the disposition of your shares by comparing the **amount you realize** with the **adjusted basis** of your shares. If the amount you realize is more than the adjusted basis of the shares, you have a gain. If the amount you realize is less than the adjusted basis of the shares, you have a loss.

Adjusted basis. Adjusted basis is explained earlier under *Keeping Track of Your Basis*.

Amount you realize. The amount you realize from a disposition of your shares is the money and value of any property you receive for the shares disposed of, minus your expenses (such as redemption fees, sales commissions, sales charges, or exit fees).

Reporting information from Form 1099-B. Brokers report dispositions of mutual fund shares on Form 1099-B, or a substitute form containing substantially the same language. The form shows the sales price and indicates whether the amount reported is the gross amount or the net amount (gross minus sales expenses).

If your Form 1099-B or similar statement from the broker shows the gross sales price, do not subtract the sales commissions from it when reporting your sales price in column (d) on Schedule D. Instead, report the gross amount in column (d) and increase your cost or other basis, column (e), by any expense of the sale such as sales commissions. If your Form 1099-B shows that the gross sales price less commissions was reported to IRS, enter the net amount in column (d) of Schedule D and **do not** increase your basis in column (e) by the sales commission.

Example 1. You sold 100 shares of Fund HIJ for \$2,500. You paid a \$75 commission to the broker for handling the sale. Your Form 1099-B shows that the net sales proceeds, \$2,425 (\$2,500 - \$75), were reported to IRS. Report this amount in column (d) of Schedule D.

Example 2. You sold 200 shares of Fund KLM for \$10,000. You paid a \$100 commission to the broker for handling the sale. You bought the shares for \$5,000. Your broker reported the gross proceeds to IRS on Form 1099-B, so you increase your basis in column (e) of Schedule D to \$5,100.

Whether you use Schedule D's line 1 (for a short-term gain or loss) or line 9 (for a long-term gain or loss) depends on how long you held the shares, discussed next.

Holding Period

When you dispose of your mutual fund shares, you must determine your holding period. Determine your holding period by using the trade dates. The **trade date** is the date on which you contract to buy or sell the mutual fund shares. Most mutual funds will show the trade date on your purchase and sale confirmation statements.

Do not confuse the trade date with the settlement date, which is the date by which the mutual fund shares must be delivered and payment must be made.

Your holding period determines whether the gain or loss is a short-term capital gain or loss or a long-term capital gain or loss. If you hold the shares for one year or less, your gain or loss will be a short-term gain or loss. If you hold the shares for more than one year, your gain or loss will be a long-term gain or loss.

To find out how long you have held your shares, begin counting on the day after the day you bought the shares. (The day you bought the shares is the trade date.) This same date of each succeeding month is the start of a new month regardless of the number of days in the month before. The day you dispose of the shares (trade date) is also part of your holding period.

Example. If you bought shares on January 10, 1996 (trade date), start counting with January 11 to find out how long you have held them. The 11th of each following month is the beginning of a new month. If you sold the shares on January 10, 1997 (trade date), your holding period would not be more than one year. If you sold them on January 11, 1997, your holding period would be more than one year (12 months plus 1 day).

Mutual fund shares received as a gift. If you receive a gift of mutual fund shares and your basis is determined by the donor's basis, your holding period is considered to have started on the same day that the donor's holding period started.

Inherited mutual fund shares. If you inherit mutual fund shares, you are considered to have held the shares for more than one year (even if you disposed of the shares within one year after the decedent's death) if your basis is:

- 1) The FMV at the date of the decedent's death (or the alternate valuation date), or
- 2) The decedent's adjusted basis in the case of shares described earlier in *Shares decedent received as a gift, under Shares Acquired by Inheritance*.

Report the sale of inherited mutual fund shares on line 9 of Schedule D and write "Inherited" in column (b) instead of the date you acquired the shares.

Reinvested dividends. If you participate in an automatic dividend reinvestment plan, each full share or fractional share is considered to have been purchased on the date that each share was purchased for you. Therefore, if you sell all or part of your mutual fund shares, you might have some short-term and some long-term gains and losses.

Certain short-term losses. Special rules apply if you have a short-term loss on the sale of shares on which you received an exempt-interest dividend or a capital gain distribution.

Exempt-interest dividends. If you received exempt-interest dividends on mutual fund shares that you held for 6 months or less and sold those shares at a loss, you may claim only the part of the loss that is more than the exempt-interest dividends. Increase the sales price reported on line 1, column (d) of Schedule D by the loss not allowed. Report the loss as a short-term capital loss.

Example. On January 8, 1996, you bought a mutual fund share for \$40. On February 1, 1996, the mutual fund paid a \$5 dividend from tax-exempt interest, which is not taxable to you. On February 12, 1996, you sold the share for \$34. If it were not for the tax-exempt dividend, your loss would be \$6 (\$40 - \$34). However, you can deduct only \$1, the part of the loss that is more than the exempt-interest dividend (\$6 - \$5). On Schedule D, column (d), increase the sales price from \$34 to \$39 (the \$5 portion of the loss that is not deductible). You may deduct only \$1 as a short-term capital loss.

Capital gain distribution before short-term loss. If you received, or were considered to have received, capital gain distributions on mutual fund shares that you held for 6 months or less and sold at a loss, report only the part of the loss that is more than the capital gain distribution as a short-term capital loss. The part of the loss that is not more than the capital gain distribution is reported as a long-term capital loss. There is an exception for losses on distributions of shares under a periodic liquidation plan.

Example. On April 12, 1996, you bought a mutual fund share for \$20. On June 28, 1996, the mutual fund paid a capital gain distribution of \$2 a share, which is taxed as a long-term capital gain. On July 11, 1996, you sold the share for \$17.50. If it were not for the capital gain distribution, your loss would be a short-term loss of \$2.50. However, the part of the loss that is not more than the capital gain distribution (\$2) must be reported as a long-term capital loss. The remaining \$0.50 of the loss can be reported as a short-term capital loss.

Wash sales. If you sell mutual fund shares at a loss and within 30 days before or after the sale you buy, acquire in a taxable exchange, or acquire a contract or option to buy, **substantially identical** property, you have a wash sale. You cannot deduct losses from wash sales.

In determining whether the shares are substantially identical, you must consider all the facts and circumstances. Ordinarily, shares issued by one company are not considered to be substantially identical to shares issued by another company.

For more information on wash sales, get Publication 550.

How To Figure Gains and Losses on Schedule D

Separate your short-term gains and losses from your long-term gains and losses on all

the mutual fund shares and other capital assets you disposed of during the year. Then determine your net short-term gain or loss and your net long-term gain or loss.

Net short-term capital gain or loss. Net short-term capital gain or loss is determined by adding the gains and losses separately in columns (f) and (g) of Part I, Schedule D (Form 1040), *Capital Gains and Losses*. Enter the totals on line 7, for both columns, and subtract the smaller total from the larger one. This is the net short-term capital gain or loss. Enter this amount on line 8 of Part I.

Net long-term capital gain or loss. Net long-term capital gain or loss is determined by adding the gains and losses separately in columns (f) and (g) of Part II, Schedule D (Form 1040). Enter the totals on line 16 for both columns, and subtract the smaller total from the larger one. This is the net long-term capital gain or loss. Enter this amount on line 17 of Part II.

In figuring the long-term capital gain, you should include on line 14 of Part II, Schedule D (Form 1040), capital gain distributions received from mutual funds during the year, unless you are not required to report any other capital gains or losses. If you do not need Schedule D for other capital transactions, enter your capital gain distributions on line 13 of Form 1040.

Total Net Capital Gain or Loss

The total net capital gain or loss is determined by combining the net short-term capital gain or loss on line 8 with the net long-term capital gain or loss on line 17. Enter the result on line 18 of Part III, Schedule D (Form 1040).

Net capital gain. If line 18 of Part III, Schedule D (Form 1040) shows a gain, enter the amount on line 13 of Form 1040.

TIP *The highest tax rate on taxable income for individuals is 39.6%. However, the maximum tax rate on net capital gain income is 28%. If you have a long-term capital gain on line 17, and a net gain on line 18 of Schedule D, you may need to complete the Capital Gains Tax Worksheet in the Form 1040 instructions to figure your tax.*

Complete this worksheet only if your taxable income (line 37, Form 1040) is more than the amount shown below for your filing status.

Filing Status	Amount
Single	\$ 58,150
Married filing jointly	96,900
Qualifying widow(er) with dependent child	96,900
Married filing separately	48,450
Head of household	83,050

Net capital loss. If you have a net capital loss, your allowable capital loss deduction is the smaller of:

- 1) \$3,000 (\$1,500 if you are married and filing a separate return), or

- 2) Your net capital loss, as shown on line 18 of Schedule D.

Enter your allowable loss on line 13 of Form 1040.

Example 1. Bob and Gloria sold all of their shares in a mutual fund. The sale resulted in a capital loss of \$7,000. They had no other sales of capital assets during the year. On their joint return, they can deduct \$3,000, which is the smaller of their loss or the net capital loss limit.

If Bob and Gloria's capital loss had been \$2,000, their capital loss deduction would have been \$2,000, because it is less than the \$3,000 limit.

Example 2. Margaret has capital gains and losses for the year as follows:

	Short-term	Long-term
Gains	\$ 700	\$ 400
Losses	(800)	(2,000)

Margaret's deductible capital loss is \$1,700, which she figures as follows:

Short-term capital losses	(\$ 800)	
Subtract short-term capital gains	700	
Net short-term capital loss	(\$ 100)	
Long-term capital losses	(\$2,000)	
Subtract long-term capital gains	400	
Net long-term capital loss	(\$1,600)	
Deductible capital loss	<u><u>(\$1,700)</u></u>	

Example 3. Mary and Les file a joint return. They have a net long-term capital loss of \$5,600 and a net short-term capital gain of \$450. Their net capital loss is \$5,150 (\$5,600 - \$450). Because their net capital loss exceeds \$3,000, the amount they can deduct for the year is limited to \$3,000.

Capital loss carryovers. If your net capital losses are more than your allowable net capital loss deduction, you may carry over the excess to later years until it is completely used up. To determine your capital loss carryover, subtract from your capital loss the lesser of:

- 1) Your allowable capital loss deduction for the year, or
- 2) Your taxable income increased by your allowable capital loss deduction for the year and by your deduction for personal exemptions.

If your deductions exceed your gross income, you start the computation with a negative number.

When carried over, the loss will keep its original character as long-term or short-term. Therefore, a long-term capital loss carried over from a previous year will offset long-term gains of the current year before it offsets short-term gains of the current year.

Use the *Capital Loss Carryover Worksheet* in the Schedule D instructions to figure your capital loss carryover.

Separate returns. Capital loss carryovers from separate returns are combined if you now file a joint return. However, if you once filed

jointly and are now filing separately, a capital loss carryover from the joint return can be deducted only on the separate return of the spouse who actually had the loss.

For more information on figuring capital loss carryovers, get Publication 550.

Investment Expenses

You can generally deduct the expenses of producing taxable investment income. These include expenses for investment counseling and advice, legal and accounting fees, and investment newsletters. These expenses are deductible as miscellaneous itemized deductions to the extent that they exceed 2% of your adjusted gross income. See Chapter 3 in Publication 550 for more information.

Interest paid on money to buy or carry investment property is also deductible. See *Limit on Investment Interest Expense*, later.

Publicly offered mutual funds. Generally, mutual funds are publicly offered funds. Expenses of publicly offered mutual funds are not treated as miscellaneous itemized deductions. This is because these mutual funds report only the net amount of investment income after your share of the investment expenses has been deducted.

Nonpublicly offered mutual funds. If you own shares in a nonpublicly offered mutual fund during the year, you can deduct your share of the investment expenses on your Schedule A (Form 1040) as a miscellaneous itemized deduction to the extent your miscellaneous deductions exceed 2% of your adjusted gross income. Your share of the expenses will be shown in box 1e of Form 1099-DIV. A nonpublicly offered mutual fund is one that:

- 1) Is not continuously offered pursuant to a public offering,
- 2) Is not regularly traded on an established securities market, and
- 3) Is not held by at least 500 persons at all times during the tax year.

Contact your mutual fund if you are not sure whether it is nonpublicly offered.

Expenses allocable to exempt-interest dividends. You cannot deduct expenses that are for the collection or production of exempt-interest dividends. Expenses must be allocated if they were partly for both taxable and tax-exempt income. One accepted method for allocating expenses is to divide them in the same proportion that your tax-exempt income from the mutual fund is to your total income from the fund. To do this, you must first divide your tax-exempt income by your total income. Then multiply the result by your expenses to find the part of the expenses that relates to the tax-exempt income. You cannot deduct this part.

Example. William received \$600 in dividends from his mutual fund—exempt-interest dividends of \$480 and taxable dividends of

\$120. In earning this income, he had a \$50 expense for a newsletter on mutual funds. William divides the exempt-interest dividends by the total dividends to figure the part of the expense that is not deductible ($\$480 \div \$600 = .80$). Therefore, 80% of William's expense is for exempt-interest income. He cannot deduct \$40 (80% of \$50) of the expense. William may claim the balance of the expense, \$10, as a miscellaneous deduction subject to the 2% of adjusted gross income limit. That is the part of the expense allocable to the taxable dividends.

Limit on Investment Interest Expense

The amount you can deduct as investment interest expense may be limited in two different ways. First, you may not deduct the interest on money you borrow to buy or carry shares in a mutual fund that distributes only exempt-interest dividends. If the fund also distributes taxable dividends, you must allocate the interest between the taxable and nontaxable income. Allocate the interest using the method of allocation explained under *Expenses allocable to exempt-interest dividends*.

Second, investment interest is limited by the amount of investment income. This is explained in the following discussions.

Limit on deduction. Your deduction for investment interest expense is limited to the amount of your *net investment income* only. There is no current deduction for excess investment interest expense. However, see *Carryover*, later.

Net investment income, for these purposes, is figured by subtracting from your investment income:

- 1) Investment expenses other than interest, and
- 2) Any allowed passive activity losses other than rental real estate activity.

Investment income generally includes gross income derived from property held for investment (such as interest, dividends, annuities, and royalties). It generally does not include net capital gain derived from disposing of investment property or capital gain distributions from mutual fund shares. However, you can choose to include part or all of your net capital gain in investment income. For information on this choice, see Chapter 3 of Publication 550.

Investment expenses include all income-producing expenses relating to the investment property, other than interest expense, that are allowable deductions after subtracting 2% of adjusted gross income. In computing the amount of expenses that exceeds the 2% limit, miscellaneous expenses that are not investment expenses are disallowed before any investment expenses are disallowed.

For information on the 2% limit, get Publication 529, *Miscellaneous Deductions*. For more information on passive activity losses,

get Publication 925, *Passive Activity and At-Risk Rules*.

Example. Jane, a single taxpayer, has investment income for the year of \$12,000. Jane's investment expenses (other than interest expense) directly connected with the production of income were \$980 after subtracting the 2% limit on miscellaneous itemized deductions. Jane incurred \$12,500 of investment interest expense during the year. She had no passive activity losses. Jane figures net investment income and the limits on her investment interest expense deduction as follows:

Total investment income	\$12,000
Subtract: Investment expenses (other than interest)	980
Net investment income	\$11,020
Subtract: Investment interest expense	12,500
Excess interest expense not allowed for the year	\$ 1,480

For the year, Jane's investment interest expense deduction is limited to \$11,020 (her net investment income). The disallowed interest expense of \$1,480 can be carried forward to the following year as explained next under *Carryover*.

Carryover. You can **carry forward** to the next tax year the investment interest that you cannot deduct because of the limit. You can deduct the interest carried forward to the extent that your net investment income exceeds your investment interest in that later year.

Form 4952. Use Form 4952, *Investment Interest Expense Deduction*, to figure your investment interest expense deduction. For more information about investment interest expense, get Publication 550.

How To Get More Information

You can get help from the IRS in several ways.

Free publications and forms. To order free publications and forms, call 1-800-TAX-FORM (1-800-829-3676). You can also write to the IRS Forms Distribution Center nearest

you. Check your income tax package for the address. Your local library or post office also may have the items you need.

For a list of free tax publications, order Publication 910, *Guide to Free Tax Services*. It also contains an index of tax topics and related publications and describes other free tax information services available from IRS, including tax education and assistance programs.

If you have access to a personal computer and modem, you also can get many forms and publications electronically. See *Quick and Easy Access To Tax Help and Forms* in your income tax package for details. If space permitted, this information is at the end of this publication.

Tax questions. You can call the IRS with your tax questions. Check your income tax package or telephone book for the local number, or you can call 1-800-829-1040.

TTY/TDD equipment. If you have access to TTY/TDD equipment, you can call 1-800-829-4059 to ask tax questions or to order forms and publications. See your income tax package for the hours of operation.

Comprehensive Example

James and Mary Jones, a married couple, file a joint return for calendar year 1996, and decide not to itemize their deductions. During the year, James received gross wages of \$49,250 and had \$5,120 Federal income tax withheld. He also paid \$1,200 in estimated tax.

James and Mary received \$2,425 in interest income from their joint savings account.

They are joint shareholders in Green Publishing Company and received \$250 in ordinary dividends.

They also are joint shareholders in Mutual Fund A. They purchased 50 shares for \$1,000 on January 6, 1996. James and Mary requested that the fund reinvest all of their distributions which amounted to \$200 in 1996. After the close of the year the fund sent them Form 1099-DIV, shown later.

James and Mary were joint owners of 200 shares of Mutual Fund X, which they sold on January 6, 1996. These shares were purchased in 1981. They did not reinvest any of their distributions. Mutual Fund X sent them Form 1099-B, shown later.

Form 1040. James and Mary fill in the requested information at the top of Form 1040, including Filing Status and Exemptions. (See illustration.) On line 7, they enter James' salary of \$49,250. Since they have more than \$400 of interest and dividend income, they must fill out all of Schedule B (Form 1040). They must also complete Schedule D to report their capital gains.

Schedule B (Form 1040). On line 1, Part I, they enter their bank's name and the interest received of \$2,425. They also complete lines 2 and 4 of Schedule B and enter the \$2,425 on line 8a of Form 1040. On line 5, Part II of Schedule B (Form 1040), James and Mary list their \$250 ordinary dividends from Green Publishing Company and their \$200 gross distributions from Mutual Fund A (from box 1a, Form 1099-DIV). They enter the total of \$450 on line 6, Schedule B.

On line 7, they enter the \$25 listed in box 1c of Form 1099-DIV as *Capital gain distributions*. On line 8, they enter \$6.00 (\$5.60 rounded) from box 1d of Form 1099-DIV as *Nontaxable distributions*. They add lines 7 and 8 and enter the total on line 9. They subtract line 9 from line 6 and enter the result on line 10. This amount is their ordinary (taxable) dividends. They enter it on line 9, Form 1040.

Schedule D (Form 1040). James and Mary report the sale of their shares in Mutual Fund X in Part II of Schedule D. They purchased 200 shares on July 10, 1981, for \$10 a share. In 1982, 1985, and 1991, they received return of capital distributions that reduced the basis in the shares. See their *Mutual Fund Record*, shown later. Their adjusted basis is \$9.89 a share for a total of \$1,978. They enter this amount on line 9, column (e). They sold the shares on January 6, 1996, for \$16.14 a share, a total of \$3,228. They enter this amount on line 9, column (d). Their long-term capital gain is \$1,250, which they show in column (g).

On line 14, Part II, they enter their capital gain distribution of \$25 (line 7, Schedule B).

James and Mary add lines 9 and 14, column (g), and enter the net long-term capital gain of \$1,275 on lines 16 and 17. Since they have no short-term capital transactions, they enter the net gain on line 18, Part III, and on line 13, Form 1040.

Completing Form 1040. James and Mary add lines 7 through 21 and enter the total on line 22. Next, they figure their adjusted gross income, taxable income, and tax liability.

Basis. During the calendar year, the return of capital distribution from Mutual Fund A changed the basis in the shares that James and Mary held at that time. Therefore, they figure their current adjusted basis in their personal records. This figure will be needed when they sell or exchange their shares.

The cost basis in Mutual Fund A shares purchased by James and Mary at the beginning of the year was \$20 a share. They requested that all distributions to which they were entitled be reinvested in the fund. Therefore, the fund used their total distributions of \$200 (\$50 a quarter) to buy 8 additional shares at \$25 a share.

A return of capital of \$5.60 (listed in box 1d of Form 1099-DIV as *Nontaxable distributions*) received in November reduces their basis in the shares they owned at that time.

James and Mary keep track of their investment in Mutual Fund A using the *Mutual Fund Record*, illustrated later.

For the year Jan. 1–Dec. 31, 1996, or other tax year beginning _____, 1996, ending _____, 19 **OMB No. 1545-0074**

Schedule B—Interest and Dividend Income

Attachment Sequence No. **08**

**Part I
Interest
Income**

Note: If you had over \$400 in taxable interest income, you must also complete Part III.

(See page B-1.)

Note: If you received a Form 1099-INT, Form 1099-OID, or substitute statement from a brokerage firm, list the firm's name as the payer and enter the total interest shown on that form.

1 List name of payer. If any interest is from a seller-financed mortgage and the buyer used the property as a personal residence, see page B-1 and list this interest first. Also, show that buyer's social security number and address ▶

FIRST NATIONAL BANK OF HOMETOWN

Amount

2,425

1

2 Add the amounts on line 1

2,425

3 Excludable interest on series EE U.S. savings bonds issued after 1989 from Form 8815, line 14. You MUST attach Form 8815 to Form 1040

3

4 Subtract line 3 from line 2. Enter the result here and on Form 1040, line 8a ▶

2,425

4

**Part II
Dividend
Income**

Note: If you had over \$400 in gross dividends and/or other distributions on stock, you must also complete Part III.

(See page B-1.)

Note: If you received a Form 1099-DIV or substitute statement from a brokerage firm, list the firm's name as the payer and enter the total dividends shown on that form.

5 List name of payer. Include gross dividends and/or other distributions on stock here. Any capital gain distributions and nontaxable distributions will be deducted on lines 7 and 8 ▶
